## **Student assistant for Access data mining and analysis – Glycom A/S**

### **About Glycom A/S**

We are a 12-year-old Danish biotechnology company focused on improving human health by introducing human natural compounds (HMOs) created by the human body over millions of years of evolution. We employ a dynamic team from 16 countries in our Danish operations, which include world class R&D facilities, large scale manufacturing and business development. Our leading products are in the process of being rolled out globally in infant formulas by Nestlé. Further, we are opening up markets for new applications and are preparing for launch in early 2018.

### **The job and your role**

We are looking for a student assistant to drive the mining and analysis of data in our ambitious customer engagement program. We have recently launched a beta version of the program, and are currently in the process of transitioning towards a more scalable database structure in Access. Our aim is to learn as much as we possibly can about our user's experiences in taking our product. These learnings will form the basis for how we further develop the product and take it to market.

Your role will be to participate in the project team with the aim of supporting the team and management with mining and analysis of the data. This will include:

- Analysis and mining of data and executing queries
- Development and ongoing execution of reports and dashboards
- Development of graphs and tables
- Further development of the database

### **Required qualifications and attributes**

- You have extensive knowledge of Access and SQL
- You are able to make graphs and visualize data in Access, Excel or another software tool
- You master basic statistical tools and analysis
- You are analytical with a strong sense for the details
- As a person, you are ambitious, energetic and wants to make a difference
- You are able to work in English and be a part of an international team

### **What we offer and terms of employment**

Glycom is a fast growing, entrepreneurial and international company with strong ambitions and products that can impact world health. This entails learning and development opportunities for team members that are willing and able.

**Glycom A/S**, Kogle Allé 4, DK 2970 Hørsholm, Denmark

We expect you to be able to work 10-20 hours a week at our Hørsholm office, north of Copenhagen.

You apply by sending a brief application and a CV to: [dha@glycom.com](mailto:dha@glycom.com). We would like to welcome you on board as soon as possible.

In case of questions, please call Chief Commercial Officer Helle Warrer Poulsen at [hwp@glycom.com](mailto:hwp@glycom.com) or phone: +45 31730199.
